## PROJECTS

### Weather App

Created a weather forecast web app using JavaScript, HTML, and CSS, providing users with real-time weather information for their chosen locations.

### Temp Converter

Create a user-friendly and efficient temperature converter that could seamlessly switch between Celsius and Fahrenheit

### Netflix Page

Create a static webpage that mimics the visual design and layout of the Netflix platform, providing users with a visual representation of a streaming service.

GitHub repo :<https://github.com/Sushant2813>
